## Requirements for Certificate of Testing for Entering Japan

**※Only test certificates which show the results of the test using valid samples and testing methods below** are valid.

# <u>Va</u>lid

### Sample:

- Nasopharyngeal/Nasopharynx (Swab/smear)
- Rhinopharyngeal/Rhinopharynx (Swab/smear)
- (Deep throat)Saliva sample
- Nasopharyngeal (※) and oropharyngeal(throat) (swab /smear)

(Naso and oropharyngeal/Rhino and oropharyngeal/oro and nashopharyngeal  $(\divideontimes)$  )

(※Nasopharyngeal/Rhinopharyngeal/Nasopharynx/R hinopharynx)

## **Invalid**

- Nasal (swab/smear)
- Oral (swab/smear)
- Throat (swab/smear)
- Mid-Turbinate Nasal (swab/smear)
- Nose
- Gargle Water
- Mixture of sample "A" and "B" "A" and "B" show all types of sample(except nasopharyngeal and oropharyngeal(swab/smear)).
- <Example>
- Nasal and throat (swab/smear)
- Pharyngeal and nasal (swab/smear)
- Nasal and oropharyngeal/oropharynx (swab/smear)

#### **Testing Method:**

#### Nucleic acid amplification test

- PCR Polymerase chain reaction
- (RT-)PCR Reverse transcription PCR (real-time (RT-)PCR/Q-PCR/Fluorescence-PCR/Multiplex-PCR)
- LAMP Loop-mediated isothermal amplification (RT-LAMP)
- TMA Transcription mediated amplification
- TRC Transcription-reverse transcription concerted reaction
- Smart Amp Smart amplification process
- NEAR Nicking endonuclease amplification reaction (e.g. ID-NOW)

#### **Others**

- Next generation sequencing
- Quantitative antigen test (CLEIA/ECLEIA)
- ※Recommend in Japan as a sample/testing method for asymptomatic people.

- Antigen test/test kit
- Rapid antigen test/test kit
- Antibody test/test kit

Not recommend in Japan as a sample/testing method for asymptomatic people.

<u>Sample collection</u> must be done <u>Within 72 hours</u> before the departure time of the flight.

XThese requirements may be changed depending on infection status.
