

List of private medical institutions which can conduct PCR tests and issue test result certificates for COVID-19 before travel to Japan (As of 4th November 2021)

Please note: This list was made using the information readily available to the Embassy of Japan and the Consulate-General of Japan offices in Australia. However, please note that this is not a complete list of medical institutions which can produce the PCR test certificate. Medical institutions which provide similar services (can conduct PCR tests and issue certificates of results) who would like to be included on the list should contact the Embassy of Japan or the Consulate-General of Japan in Australia.

When entering Japan by transiting at an airport in another country, the requirements for the COVID-19 inspection certificate and medical institutions may be set separately at that airport as well.
Please check the information published by the airport or the government of the country concerned.
